

## Solutions Architect - Oracle ERP

Reports to: Head of Solutions Architecture

Department: IT

Location: Cheshire

### The ideal candidate

This assignment is suited to someone looking for a complex and delivery-focussed environment, with lots of moving parts. You will be an experienced Solutions Architect with a specialism in Oracle ERP, with experience in areas like HR and Payroll. Whilst you'll have a technical skill-set you will be competent working closely with a variety of cross-functional stakeholders - it's key that you have the personal skills to deal with

**This purpose of this engagement is to be the SA lead on a piece of work to migrate existing ERP, HR, and Payroll from on-prem to Cloud.**

### The successful candidate will:

- Worked around Oracle ERP for a considerable number of years as an SME and Architect.
- Some Cloud awareness (but not necessarily an expert, as support will come from a dedicated Cloud team)
- A significant track record as an Architect for large, complex organisations - preferably business to consumer
- Detailed knowledge of Oracle ERP and some knowledge of the broader vendor landscape
- Both implementation and migration experience
- Excellent people and communication skills.

### More Information

£600 per day

Minimum duration 6 months
